

**NEW PRODUCT**

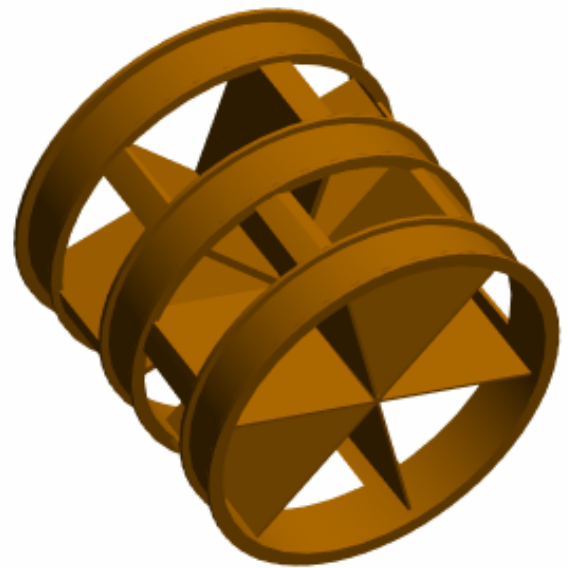

# PaIIPAK100

## Biological & Trickle Filter Media

The Pall Ring Company is pleased to introduce its brand new product **PaIIPAK100** random plastic media combines a high surface area for aerobic or anerobic biological treatment of waste water with excellent liquid distribution and high voidage

### FEATURES:

- Strong & long lasting
- Large surface area to encourage growth of micro-organisms
- Low installation & maintenance cost
- Low blocking tendency
- High voidage ensures a flow pattern which gives continual contact between effluent & biomass.
- UV stabilized & chemically inert PP. Immune to fungal or bacterial attack.
- Easy to ship
- Cost effective solution

### Technical details:

Surface Area (m <sup>2</sup> /m <sup>3</sup> )	100
Weight (kg's)	50
Dimensions	90mm x 90mm
Free Space	96%
Temp Range	0-90°C
